Forecast for Sunday 05 Sep 2021

Weather: Some patchy fog is likely in valleys first thing, but these will clear soon after dawn. Otherwise it will stay dry all day with some cloud giving fog on the summits, and plenty of warm sunny spells. There will be very little wind.

Chance of cloud free mountain/hill tops above 600m: 60% at first, becoming 90% by late morning.

Visibility: Mostly good, with views of distant hills, although these may be somewhat hazy at times. Where cloud covers the hill tops, and in early valley fog, visibility will be very poor with nearby landmarks obscured. Areas of cloud with bases down to 400m during the morning, this lifting to leave some patches covering the higher peaks at times.
